MEMORANDUM FOR THE RECORD:

SUBJECT: Single-Man Posts

25X1 1. The attached memorandum was discussed 21 January 1958
with [] In anticipation of this meeting, I had taken up
the matter of staffing patterns and base designations in relation
25X1 to single-man posts (other than stations) with []
[] and I came to the conclusion that it would be
inappropriate to make a complete review and analysis of all exist-
ing one-man bases with the thought that they (any or all) might be
removed from base status. We did feel, however, that it would be
advisable to make an analysis of each new recommendation for a
one-man post or a station already existing to determine whether it
should be actually a base or considered as a one-man extension
from the station.

25X1 2. In the discussion with [] he concurred whole-
heartedly in the conclusions arrived at by [] and
myself. He went on to add that he would appreciate it if SSA-DD/S
would make this analysis on each new case and recommend to him
whether it should be classed as a base or merely a one-man post
extension of the station. Points which [] and I passed
over in thinking about the basis for such a judgment included the
fact that a Base Chief would normally be considered a person who
would interpret and apply policy, communicate directly with Head-
quarters, and operate on a somewhat independent basis.

[]
Special Support Assistant
to the
Deputy Director (Support)
